

Summit Themes

- Knowledge-based (urban) development
- Knowledge-based economy and value generation
- Knowledge/creative/smart/ubiquitous/intelligent cities, regions and societies
- Knowledge cluster, enterprise and organisations
- Knowledge workers and creativity
- Urban and regional sustainable transportation
- Knowledge cities for education
- Creativity, innovation technology and learning communities
- Globalisation, urban environment, processes and dynamics of cities
- Sustainable (urban) development, climate change and quality of life

Other topics relevant to the Summit but not included in the list above will also be considered

Call for Abstracts & Papers

Deadline for abstract submission – **15th May, 2011**

Deadline for paper submission – **4th August, 2011**

We invite you to submit your abstracts and full papers via www.knowled gecities2011.org.

All submitted abstracts and papers will go through a double-blind review by at least two referees. The review will support the selection process of those abstracts and papers that will be accepted for their presentation at the Summit, as well as those to be selected for publication in books and journals.

The 4th Knowledge Cities World Summit

14-17 November, 2011 | Holon and Galilee, Israel

Knowledge Cities for Future Generations

“It takes a village to raise a child” (Hillary Clinton 2007)

Call for Abstracts & Papers

Hosts:

Partners:

www.knowled gecities2011.org

Dear Colleagues,

In recent years, with the impact of global knowledge economy, a more comprehensive development approach has gained significant popularity. This new development approach, so called 'knowledge-based development', is different from its traditional predecessor. With a much more balanced focus on all of the four key development domains – economic, enviro-urban, institutional, and socio-cultural – this contemporary approach, aims to bring economic prosperity, environmental sustainability and local institutional competence with a just socio-spatial order to our cities and regions. The ultimate goal of knowledge-based development is to produce a city purposefully designed to encourage the continuous production, circulation and commercialisation of social and scientific knowledge – this will in turn establish a 'knowledge city'.

A city following the 'knowledge city' concept embarks on a strategic mission to firmly encourage and nurture locally focussed innovation, science and creativity within the context of an expanding knowledge economy and society. In this regard a 'knowledge city' can be seen as an integrated city, which physically and institutionally combines the functions of a science and technology park with civic and residential functions and urban amenities. It also offers one of the effective paradigms for the sustainable cities of our time.

This timely Israel 2011 Summit – The 4th Knowledge Cities World Summit – makes an important reminder that the 'knowledge city' concept is a key notion in the 21st Century development. Considering this notion, the Summit aims to shed light on the multi-faceted dimensions and various scales of building a 'knowledge city' via 'knowledge-based development' paradigm by particularly focusing on the overall Summit theme of 'Knowledge Cities for Future Generations'.

At this summit, the theoretical and practical maturing of knowledge-based development paradigms will be advanced through the interplay between the world's leading academics' theories and the practical models and strategies of practitioners' and policy makers' drawn from around the world. As chairs of The Israel 2011 Summit, we hope to see you join us in Holon and Galilee, Israel, between 14 and 17 November 2011, to co-create an atmosphere for knowledge generation and sharing, and significantly contribute to the research, governance, and practice circles.

Dr. Tan Yigitcanlar

Dr. Edna Pasher

Prof. Baruch Lev

Chairs of The 4th Knowledge Cities World Summit

Keynote Speakers

Prof. Nicos Komninou, Aristotle University, Greece
Prof. Antti Lönnqvist, Tampere University of Technology, Finland
